CONFERENCE OBJECTIVE

NATCOM, a one day National Conference on Contemporary Research in Green Computing (CRGC-2019) is being organized with an objective to provide a forum to stakeholders (researchers, academicians, students, industrialist and society) to meet and share the latest ideas, views and new findings in the field of Green Computing. It also provides a space for students and researchers to meet, discuss, and learn with experts in the related field. Developments in the field of cloud computing specially in green computing are very advances and necessary to the society. The changes in this field are so rapid and occurring on day to day basis. The conference will be proposed on 09 March 2019, where authors of the accepted papers will be present their research ideas and results in front of a group of nobles as well as researchers who would offer an assessment to their presentations and provide suggestions. It promotes a high level of interaction among stakeholders in theoretical, experimental, and applied concepts in the field of computing and informatics. Submissions may either be a complete work or work in progress, with directions for future research. This national conference include the following sub themes-
