Following points were discussed in the meeting:-

As per CPCB new guidelines for the prevention of spreading COVID-19

1. You are requested to use double yellow bags for keeping any kind of infectious waste and tie it properly before handing it to treatment facility.
2. Central pollution Control Board guidelines are based on current knowledge on COVID -19 and existing practices in management of infectious waste generated in hospital while treating viral and other contagious disease like HIV, H1N1, etc.

3. A label "COVID-19 Isolation wards or Quarantine wards Waste" to be pasted on Polly bags.
4. The (inner and outer) surface of containers/bins/trollys used for storage of COVID-19 Waste should be disinfected with 1% sodium hypochlorite solution.
5. Biomedical waste collected in such isolation wards & Quarantine wards can also be lifted directly from wards into CBWTF Collection van.
6. General waste not having contamination should be disposed as solid waste as per SWM Rules, 2016.(In black Polly bags)
7. COVID-19 Sweeper in Isolation Words and Quarantine Words Use PPE Completely.

(N95, Goggles Gown 'water resistant' Heavy Duty gloves, Boots, shoe cover etc.)
8. Maintain separate record of biomedical waste generated from COVID-19 isolation wards & quarantine wards.

(Dr. R.P. Singh)
